

Dear Sir

Overview of my immigration history

I forgot to attach files I mentioned in the email. But they are inside the Dropbox link underlined as "HERE". If you need these files sent to you again as an attachment I will do so.

My UK visitor visas have been refused in 2022 and 2023 in connection with my UK immigration history 2004-2018.

I lived in the UK from 2004 to 2018. During this 14-year period, I was repeatedly refused Indefinite Leave to Remain.

In 2018, I left the UK by voluntary departure. I entered Ireland via bus from Belfast.

My entry into the UK (2004) was caused by my marriage to an English citizen. We travelled through many countries before coming to the UK.

There appeared to be stress and tension in the UK. Some people were prejudiced about someone with brown skin being married to a white man. A lot of people were criticising us. Our marriage broke up inside the probationary period which ended in November 2006.

I found a second relationship, with my present boyfriend Alex McDowell. The Home Office disputed that I found him before the end of the probationary period. Nothing was proved regarding this matter. But the Home Office decided to refuse me this relationship.

They also decided to refuse me the right to work in the UK. This happened at the end of the probationary period when UKBA had to decide if I could work in the UK.

I feel that it is very unusual for UKBA to refuse right to work to a physics graduate from the University of Manchester when there was a craze for Women in Physics.

What you need to know about this matter is - in November 2006 -(when they had to decide about giving me a right to work- I had ALREADY BEEN EXPELLED from the Institute of Physics membership. The Institute of Physics are a "Royal Society" registered with the charities commission.

One immigration lawyer speculated (later) that because the Institute of Physics is very intimate with the British Home Office, they might have wanted me out of the country for the same reason as they expelled me.

Starting in November 2006 and right up to my departure in 2018, I was making immigration applications and being refused. Most of the applications were f-l-r-o.

I still have a notice of refusal from the UK BA of 2009 which says I am banned from having a private life in the UK. This notice of refusal says I cannot have a boyfriend or husband in the UK soil, and "do it somewhere else" or Alex can migrate to India.

This suggests to me that by 2009, the UK BA did not want me working or marrying on UK soil, which would in turn make sure I had no legal right to stay.

Up to this point -end of 2009 -we had not had any trouble with the UKBA.

In 2010, male staff from the Pembroke Mental Health Center which is near Alex's home started to visit us when Alex had gone to work. They would kick and bang the door and try to force me to talk to them. They would try to hook me up with female employees of the Pembroke. The Pembroke Mental Health Center is staffed with social or outreach workers. They are not educated and they are not doctors. These centres have a psychiatrist visiting them once in a while. They are like a coffee house of friendship but are not friendly people.

I was not able to remove the frightening Pembroke men from outside the front door by complaining to the police. It was like these men had the blessings of the police. My GP said he was not involved. Actually I believe that doctors/NHS were not involved in my mental health pursuit in the UK.

We never found out which agency authorized Pembroke employees to keep kicking Alex's door when he was away. But the UKBA accepted responsibility for one of those incidents, during which Alex's front door was broken while he was at work. It was the UK BA trying to get me into their specially-arranged psychiatric van, but I was not at home. A few months later I was given notice IS151D flight directions to India, and driven to Yarlswood IDC

The negative is very difficult to prove. However, if you ever access my record you will find only two psychiatric reports. Both of them are written by immigration lawyers. The mental health issues that plagued by immigration case was not blessed by the Medical Profession.

There was a 2-3 week period in 2014 when I was naughty and wanted to avoid a potential deportation date. I went to Hillingdon Hospital purposely with needles stuck in my hands in order to get sectioned. Although my trick worked, it was a stupid thing I would not repeat. I was very lucky to escape a psychiatric injection that may have killed me and would have certainly induced a heart attack. None of this would have been possible without Alex, and due to his support, my parents attended, and requested that injection be averted. Except for that 2-3 week period, I did not receive psychiatric medicine in the UK the entire 14 years.

And I have been going in and out of half of hospital for six years in Ireland, and if doctors felt there would anything psychiatric it would have come up.

In July 2013, I suffered a trumped-up criminal conviction by my sister. The name of the conviction is harassment without violence. Most criminal convictions have a genuine basis. Also it is common for people who have done something wrong, to claim innocence. Naturally most people do not believe trumped up convictions can happen. People also feel the conviction must be real, since my sister is a woman and women are never liars, while she probably loves me as she is my sister.

Proper procedures were not used in my conviction in which I was not given appeal rights.

An immigration lawyer cannot do anything about a criminal conviction and the fact I claim it is trumped up. Even so, I have accessed my criminal check of UK and Ireland which accounts for

20 years. Except for this criminal conviction, I have no criminal record in these countries. I want to access similar records from Usa and Canada that would account for most of my life. Surely you can then see that there is proof that most of my life – I am 65!!! - MY SISTERS IS THE ONLY CRIMINAL RECORD -Also its been 11 years (2013-2024) since the conviction and I have not contacted the sister.

My sister told my father in 2024, she will NEVER drop the injunction to not contact her. This means I can never enter the UK. A Christian pastor helped me in March 2024 to find out father 91 is now too weak to live alone and has moved in with my sister. My father is dead to the phone for over a month. It is possible my sister snatched his phone. My fathers voice is hollow and not reassuring. My sister recently refused a registered post letter addressed to Daddy and failed to open the door when an Indian Tamil friend went to do a live and well check on Daddy. His two neighbours are dodgy about telling me how he is. They say he is with your sister and thats all we know. My fathers GP's secretary said she cannot tell me if my father is alive or dead. Basingstoke police who I talked to about my criminal conviction at Basingstoke Magistrates said they dont get involved in family matters and to ask Tadley social services.

Most of my immigrations applications to UK BA were partner applications, made as FLROs.

They were serially refused.

I felt lawyers were acting against me for the following two reasons. The lawyers, as soon as an FLRO was refused, they would make another FLRO application of identical content. Also, the application content was based portrayal of me as s simple moron with a “partner” and mental health issues and nothing else going on. I would suspect such an application to be fraudulent, But so did the judge. The Notices of Refusal showed annoyance by the caseworkers, A big problem was also this mental health allegation not being backed with medical evidence.

I knew this rule BEFORE COMING TO THE UK that nobody but a licensed physician can give medical evidence. My lawyer cannot just say my client is crazy, to a judge. Alex refused to understand, as he believes it is best to do whatever lawyers say. In fact, one person said I must not disclose I have a Physics degree from the UK – that is to declare belonging, and possibly to work – since we are making a partner application. He said nothing but “partner” and “mental health reason” should be disclosed for the in country appeal. He also wrote a letter to the judge asking that I need not attend my in-country appeal, as I could not understand instructions due to mental health reasons. Although we terminated that relationship, there and then, someone else acted against me as the in person hearing.

I don't know/remember name of the higher court but we had an in country appeal in April 2017.

Finally in 2018 I had to attend the Further Submissions Court in Liverpool. A lawyer from India had pressured me to apply for asylum along with the partner application. He had written to the home office I was a cheat and wished to make a dual application and that both were false. He also gave a copy of that letter to me close to the end. When I was waiting in Liverpool someone tipped me off to go to Ireland

The following information is confidential. I have explained what amounted to my legal representatives acting so as to get me deported. Indian and English lawyers and nobody else acted against me. If the lawyer was Pakistani for example they would not. They were very kind and could be trusted. One very kind man helped me escape from the building when I was about to "go for interviews" (slang for removal order) and did not even want money.

I await your conference date. I will not disturb.

Thanks

Mohini Hersom
