Dear Mr. Abu;

You were going to have conferences with me and a barrister assisting you, then re-open the criminal conviction. I was not well that Friday and delayed. It was a Friday after we met with Alex face-to-face. I can't remember the date.

I messaged you 29 October and you said you will call me back. You have not called. Today for the first time you declined my call.

I have a chronic illness and am not getting proper treatment in Ireland. I know you do not believe / not getting proper treatment in Ireland. All I can do is if you require, produce a medical letter saying I have these chronic illnesses. If you like I can send you such a letter dated October 2023.

I am have multiple things to do and greatly slowed down.

Are you going to open the criminal case?

Are you going to look into the case to see if you open it?

I did send the court attendances but you were busy and needed them again. You will not find material to bust the case from the court attendances I have some material but it is voluminous. I wanted to talk to you and your barrister to say it orally so you can understand and read what you need to

One of two goals is that (hopefully, and as long as you see it or feel it is plausible) the court will understand I was maliciously lied about by my sister. The other goal is one a solicitor cannot help me with is getting rid of women from my life. At present my life is like a woman's prison,

For these two goals I am prepared to die, I am not trying to die. I prefer to live but not at all costs. My conscience is clear, and as i do not have dependant young children, so I can die.

This is not to put pressure on you. I have been abused very badly and am tired of the whole thing. I suffered a miscarriage of justice

It is my human right to decide not to live under false allegations and if i dont like being with women all the time I have a right to get out of it. I have a right to die if no man can give me that understanding. Alex has said he most certainly cannot give me that understanding. He works for the Institute of Physics who have a racial hygiene policy whereby women should go with women. I want to stay on the subject.

Well although Alex and I are optimistic about the judicial review as you have won cases in the past, the home office have been exceptionally harsh with me and not provided a reason. Everything happens with a reason.

Thanks
Mohini
