Dear Mr Abu

You have said the judicial review was lost. But if you are able to overturn the criminal conviction, you will still be able to help with the VISA.

You have been avoiding me. Alex and I understand you don't have total control over the process of winning. But we have been disappointed many many times. Naturally we feel that lawyers might desert us

I know you are very busy. Please meet with us at your earliest opportunity. Please show us that you are doing your best to win. I cannot trust your silence and your staying away because that means you are acting like the rest of the lawyers

When I was doing the immigration case, these lawyers were making the same case over and over, even though it was being refused. I am sure that would get the judges pissed off. I never wanted such a case nor did I consider it truthful. But Alex was paying and he didn't think there was anything wrong with it. Alex did not understand that a case which says I have a partner and a mental health problem will not win. I feel the lawyers would know more than me so they must have been doing it on purpose to make me lose my case.

When I was on the trumped up criminal conviction I had a legal aid lawyer who was Indian and he was doing his best to get me into jail.

Mr Abu if you just stay away from us will feel that you like the rest of the lawyers and this whole country is doing something to me for political reasons .

A matchstick cannot stand up against the whole nation. What is in my control is to DIE and end being in a same sex environment and to end that putdown "depressed". I do not own up to this. I would like to see bad things happen to more people so they too can be unhappy. When the standard of life goes down, people will stop seeing me as depressed. I hope women will start to suffer from acts of God then I will get more respect. I am sure women will be more and more depressed.

You're only entrusted with the legal matter. You're not responsible for all that.

But I have to let you know something. I do intend to die over this miscarriage of Justice with the criminal conviction. The fact that the miscreants are going to get away with it. The fact of how badly it was treated by Hampshire County Council and others are and my father died.

I want worldwide publicity and to die but I don't think I'll get worldwide publicity. Not before I die. They'll try and make me as anonymous as possible. The home office will be glad if I die but I'm not talking to them right?

But like I said you don't have total control and you are only interested with the legal matter

I did hear you say I pleaded guilty because I was depressed. I hope you have never used the word depressed in connection with me. I'm sure you know more than me and that no judge will accept that they pleaded guilty wrongly because they were depressed.

These were your words not mine.
