I have just seen your email. I will follow your instructions, to read it and sign it. But in the morning. It is late and I am sick

But I have ro shut up and sign it even if I have questions or concerns . I note that you not only do not want messages - other than exactly what you ask - after giving this instruction ,but you deleted older WhatsApp messages to look like i never messaged you

Testifing in court is a basic human right. You are awarding me that right conditionally as long as I do an intimacy chit chat with a woman who would be my sex brain interpreter or seeing eye dog or amanuesis to the court (like you did in the criminal case but I refused and in the end the case was hung indefinitely with the court not releasing some document. To this day you have not told us what documents were not released) Naturally I speculate you would have been able to proceed with opening the criminal conviction. Now I must just keep obeying and you will once again offer me that right to testify in court if do an intimacy chit chat with the same woman. I lose the right to testify. and you will not represent me

Either the UK government or yourself has denied .me the right to render testimony in their courts of law as long as I accept i am not a person in my own right. I must cling to a woman's apron strings being not allowed to speak for myself.

So often in London and Dublin I am familiar with men threatening me ro pair with a woman. She pleases and gives unimaginable gifts. Of course if o comply I have a right to life but there is a price ro pay.

What you (they) are doing with me and "woman" is like humans and Jesus Christ. You wilk burn in he'll but if you cling to him you will be saved. I am justified to the court by going through a woman. Otherwise I will be thrown in the pit of fire

Dear Mohini

Please find the attached Draft POC, witness statement and claim form in relation to challenging the Wills. Please read it and sign it. The work in relation to the afore-mentioned matter is completed and delivered.

Kind Regards
